

Pritt Nyerere

Cybersecurity Analyst | DFIR | Cyber Threat Intelligence (CTI) | Security Automation

Email: prittnyerere@gmail.com | **LinkedIn:** <https://www.linkedin.com/in/prittnyereredfir/> | **GitHub:** <https://github.com/Pritt014>

PROFESSIONAL SUMMARY

Cybersecurity-focused technology professional with hands-on experience in Digital Forensics and Incident Response (DFIR), threat hunting, network security, security automation, and Python-based security tool development. Skilled in vulnerability assessment, network reconnaissance, security analysis, SIEM concepts, and defensive security practices.

Experienced in software development and digital systems, with practical knowledge building applications, APIs, and technology solutions.

TECHNICAL SKILLS

Cybersecurity: Digital Forensics and Incident Response (DFIR), Security Operations Center (SOC), Threat Hunting, Threat Intelligence, Vulnerability Assessment, SIEM, Security Monitoring, Incident Investigation, Network Security, Security Automation

Tools: Splunk, QRadar, Wireshark, TShark, Nmap, Nessus, Metasploit, Impacket

Programming: Python, JavaScript, React, FastAPI, Node.js, REST APIs, SQL, Git

Systems: Linux, Windows, TCP/IP, Packet Analysis, Network Analysis

PROFESSIONAL EXPERIENCE

Web Developer / Digital Systems Specialist

KBC Digital & KBC Channel 1 | Aug 2022 – Present

- Develop and maintain cross-platform digital platforms and web applications supporting online services and audience engagement.
- Build applications using React, Node.js, FastAPI, and REST APIs while supporting system troubleshooting, API integration, and platform improvements.

Head of Operations (Acting)

Greener Pass Agency Limited | November 2025 – April 2026

- Managed digital workflows, reporting systems, and technology-supported business processes.

PROJECTS

Silent Scope - Cybersecurity Reconnaissance Framework

Role: Cybersecurity Tool Developer

- Developed a Python-based reconnaissance framework for security assessments, network enumeration, and automated information gathering.

AsyncScanX - Asynchronous Network Scanner

Role: Security Tool Developer

- Built a Python-based asynchronous scanner for host discovery, service enumeration, and network security testing.

TCP Hawk - Network Analysis Tool

Role: Network Security Developer

- Developed a network analysis utility focused on packet analysis, traffic visibility, and security monitoring.

KBC Listen App

Role: Full-Stack Developer

- Developed a digital audio platform using React, Strapi CMS, and REST APIs for content management and digital delivery.

NIMBA Weather Application

Role: Full-Stack Developer

- Built a full-stack weather application using FastAPI, Python, REST APIs, and frontend technologies.

CERTIFICATIONS

IBM Cybersecurity Analyst Professional Certificate | DFIR | Cyber Threat Intelligence | Penetration Testing | Cryptography | CompTIA Security+ (In Progress)

EDUCATION

BA - Human Resource Development
Kisii University | Graduation Year: 2014
